

RAHMX Reimagined - DemoX-Reimagined

About the Project

RAHMX Reimagined is a next-generation showcase site for a visionary AI company pioneering Sacred AI - blending memory, ethics, and human dignity with cutting-edge technology. It features ZamaGPT memory systems, VaultDNA-secured data, and an elegant modern UI.

Features

- Dynamic homepage with fluid transitions
- Real-time AI integration using Google Gemini
- Animated ethical vision cards
- Persistent memory UX
- Modular UI with Tailwind + ShadCN

Tech Stack

- Next.js (App Router)
- Genkit + Google Gemini
- React + TypeScript
- Tailwind CSS + Lucide Icons
- Firebase Hosting

Prerequisites

- Node.js v20+
- npm v10+
- Firebase CLI: `npm install -g firebase-tools`

Installation

1. `git clone https://github.com/devkhan1/DemoX-Reimagined.git`
2. `cd DemoX-Reimagined`
3. `npm install`
4. Add `GOOGLE_API_KEY` in `.env`

RAHMX Reimagined - DemoX-Reimagined

Usage

- Run: npm run dev (localhost:9002)
- Build: npm run build
- Deploy: firebase deploy --only hosting

Pricing & Service Options

Starter (GBP 2,500): Site clone + contact form

Pro (GBP 8,000): Branding + Firebase setup

Agency (GBP 25,000): White-label + ZamaGPT + memory dashboard
